DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, drawn to multi-polarized forward feed and dish configuration, classified in class 343, subclass 773.
- II. Claims 24-32, drawn to multi-polarized forward feed and two reflector dish configuration, classified in class 343, subclass 776.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as having a two-port power divider. See MPEP § 806.05(d).

A telephone call was made to Scott Oldham on 27 April 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
